

Champlain Shootout 2009 Photos

Thanks for your interest in Champlain Shootout 2008 Photos.

Over the course of the weekend I shot just under 10,000 photos. I especially enjoyed the comradely amongst the team members and I hope I captured some of that at least in a few shots. Please be patient as I process your orders. I have a lot of photos to go through.

The images I captured are all digital. Full size uncropped images are 10 megapixels, that is enough resolution to print as large as 17" X 25" or blown up 4 times from a 4" X 6" print.

I will first post a gallery of all the images that are any good. Look through them and try to identify those images that you might like to have. I will have already made minor adjustments for exposure, but generally I have not cropped or really done any cleanup. So if the subject in an image seems a bit small I will likely crop and blow it up in the final production.

If you send me an email with a list of the images you are interested in I'll process them for sure. Otherwise it will be photographer's choice and I will likely process 10-20 of the best photos from each game.

You have a few options to receive the images you select.
